### **REASONS FOR ALLOWANCE**

Claims 1, 8, and 13-21 are allowed.

The following is an examiner's statement of reasons for allowance: Applicant's amendments overcome the previously applied rejections. As per independent claim 1, the prior art does not teach the motor controller combination as recited, and in particular wherein the control unit controls the amplitude of the motor current according to an absolute value of an output voltage of the a.c. power source such that a current flowing in the brushless motor becomes small during a period when the absolute value of the output voltage of the a.c. power source increases and becomes great during a period when the absolute value of the output voltage of the a.c. power source decreases. As per independent claim 13, the prior art does not teach the motor controller combination as recited, and in particular wherein the control unit controls the motor current via the inverter circuit so as to restrict the rotational speed fluctuation of: the brushless motor caused by load torque fluctuation and controls a current output from the a.c. power source to the power converter based on the comparison between the amplitude of the motor current and the average of the motor current.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
